

# 100-foot energy storage container for oil refineries

## ESS

## Overview

---

The Crude & HFO Storage Tank is specifically designed for the storage of heavy fuel oils (HFO), crude oil, and similarly viscous hydrocarbon products. Its reinforced insulation and heating options ensure safe and stable storage across a range of operational temperatures. The most common shape used is the vertical, cylindrical storage tank. Gross capacities can range from 100 bbl to over 1. Corresponding tank sizes range from approximately 10 ft in diameter to over 412 ft in diameter for some of the largest floating-roof tanks ever. Westerman oilfield storage tanks are made to fit your specific field demands—delivering superior quality, long life and streamlined installation. Their design, operation, and maintenance. To protect the environment and ensure regulatory compliance, petroleum refining spaces and oil storage facilities with petroleum bulk storage must provide secondary containment solutions that guard against leaks and spills.
