

120-foot energy storage container for subway stations

Overview

SunTrain seamlessly stores green energy from remote solar and wind farms within customized battery containers that are transported over existing railroad networks. Adding Containerized Battery Energy Storage System (BESS) to solar, wind, EV charger, and other renewable energy applications can reduce energy costs, minimize carbon footprint, and increase energy efficiency. In projects such as events powered by generators, the ZBC range acts as a buffer for variable loads and maximizes fuel savings. To cope with the problem of no or difficult grid access for base stations, and in line with the policy trend of energy saving and emission reduction, Huijue Group has launched an. It can be widely used in application scenarios such as industrial parks, community business districts, photovoltaic charging stations, and substation energy storage. It can meet the company's application needs such as peak shaving, dynamic capacity expansion, demand-side response, and virtual power.

120-foot energy storage container for subway stations

Energy storage container, BESS container

Adding Containerized Battery Energy Storage System (BESS) to solar, wind, EV charger, and other renewable energy applications can reduce energy costs, minimize carbon footprint, and increase energy efficiency.
