

1MW Solar Energy Storage Unit for a New Zealand Water Plant

Overview

The one-megawatt array covers one hectare and consists of more than 2700 solar panels and 4000 floating pontoons. It floats on a treated wastewater pond next to the Northern motorway and will generate 1,486MWh per year. D3Energy, in partnership with Vector Group, delivered the first mega-watt scale floating solar system in New Zealand and the largest solar project of any type within the country. 3□Multi-scenario application, flexible configuration and. The MEGATRON 1MW Battery Energy Storage System (AC Coupled) is an essential component and a critical supporting technology for smart grid and renewable energy (wind and solar).

1MW Solar Energy Storage Unit for a New Zealand Water Plant

New Zealand: the country's largest floating solar power plant

In New Zealand, Vector Powersmart has just completed construction of the country's largest solar power plant. This one has a power of only 1 mW but has the peculiarity of buoyancy.
