

25kW Photovoltaic Container for Wastewater Treatment Plants

Overview

This paper presents a novel approach to integrating PV technology with WWTPs infrastructure. Toward improving system efficiency and reducing operating costs. The solar micro-power sewage treatment equipment generates electricity through solar photovoltaic panels to drive an efficient sewage purification process. As a result, these modules are getting cheaper. Switching to solar energy can bring numerous benefits to wastewater. Biocell Water containerised wastewater treatment plants offer a fast and effective above ground portable wastewater treatment system solution for any site, without the need for any existing infrastructure.

25kW Photovoltaic Container for Wastewater Treatment Plants

Mobile Wastewater Treatment Plants In Containers

The ClearFox® Containerized System is a packaged wastewater treatment plant, custom designed and pre-installed within ISO shipping containers. As a modular solution, it is easily transportable by land ...
