

27 kW solar energy price

Overview

The average cost of solar panels ranges from \$2.50 per watt installed, with most homeowners paying between \$15,000 and \$35,000 for a complete system before incentives. Federal Tax Credit Urgency: With Congress proposing to end the 30% federal tax credit after 2025, homeowners. Our estimator shows how many solar panels your home needs. We generate an online cost and savings estimate. You choose how many solar companies send you an exact price by email or text. Click on your state for solar panels cost localized to your city or use the solar calculator above to see the live. Most homeowners spend between \$12,600 and \$33,376 to install a complete residential solar system in 2026, with the national average at \$19,873 before incentives. Your actual cost depends on your home's energy needs, roof characteristics, location and other factors, all of which we'll break down in. NLR analyzes the total costs associated with installing photovoltaic (PV) systems for residential rooftop, commercial rooftop, and utility-scale ground-mount systems. NLR's PV cost benchmarking work uses a bottom-up. Marketplace snapshot (national): EnergySage's latest update (S) shows the average cost-per-watt at ~\$2. Their 12-kW example prices are \$29,649 before and \$20,754 after the federal credit, and they explicitly flag that the 30% credit ends for new residential.
