

60 000 watts of solar energy

Overview

It means that you would need anywhere from 100 to 200 panels to build a 60000 watt solar system. Generally, 72/144-cell, 96-cell or larger panels are used in commercial systems, whereas 60/120-cell are more common in home systems. Use this solar calculator to estimate the system size needed for your actual energy consumption. Need Help?
