

A new type of solar power generation

Overview

A new breakthrough in solar technology with the development of perovskite solar cells offers greater efficiency and reduced costs compared to traditional silicon cells. This innovation addresses major commercialization challenges, notably improving cell stability and manufacturing. These advances are making solar technology more powerful, affordable, and versatile, accelerating the adoption of solar energy technology across residential, commercial, and utility-scale projects. Solar cells that combine traditional silicon with cutting-edge perovskites could push the efficiency of solar panels to new heights. Beyond Silicon, Caelux, First Solar, Hanwha Q Cells, Oxford PV, Swift Solar, Tandem PV 3 to 5 years In November 2023, a buzzy solar technology broke yet another world. Researchers engineered a solar thermoelectric generator 15 times more efficient than current state-of-the-art devices.

A new type of solar power generation

What is new without type in C#?

In the specific case of throw, throw new() is a shorthand for throw new Exception(). The feature was introduced in c# 9 and you can find the documentation as Target-typed new ...
