10 years
warranty

Overview

The project responds to the growing local and international electric vehicle market by developing charging stations in key areas throughout Amman. Investment opportunities target renewable energy companies, electric vehicle agencies, and specialized EV infrastructure providers. It examines government policies, market dynamics, technological advancements, and infrastructure development through semi-structured interviews with key stakeholders, including government officials. Abdali Investment and Development has unveiled a seven-point ultra-fast DC charging station in central Amman, deployed with Grasen and the Arab National Cars Company.
