

# Amsterdam electric vehicle costs

*Test certification*  
CE  FC 

## Overview

---

The cost of charging an EV in the Netherlands depends on where and how you charge: Home Charging: Around €0. 25 per kWh (with off-peak energy contracts, it can be even lower). 85 per kWh, depending on. Research by Tap Electric found that there are big increases in public charging costs across Dutch cities between December 2024 and January 2025. Among the largest cities, Amsterdam drivers are hit the hardest, paying 25% more. The tax has led to significant price variations, even among charging stations operated by the same provider, in some cases. In response to growing electricity demand and the rising number of electric vehicles in the city, the Municipality of Amsterdam has launched a six-month smart charging pilot. What is Total Cost of Ownership (TCO)?

TCO is the complete cost of owning and operating a vehicle over its ownership period. You only pay the kilowatt-hour price of your own supplier with this.
