

# Analysis of the reasons for the price reduction of Tongwei photovoltaic panels

## Overview

---

It attributes the decline to severe PV oversupply and sharp price drops across the solar value chain, resulting from the demand-supply imbalance. Despite these challenges, its core PV business and agricultural and animal husbandry businesses maintained stable performance, said. Two major photovoltaic companies vowed on Tuesday to cut production volume as the industry navigates through supply-demand imbalances and excess outdated capacity, leading to intense price-centered competition. Experts deem output management and technological innovation as crucial for companies to. Chinese manufacturer says it navigated price pressures through operational efficiencies & R&D investments Tongwei Co. 7 billion) in operating revenues for H1 2025, down 7. 44B) for 2025, marking its worst performance on record. SH) reported a preliminary net loss of ¥4. 04 billion annual. The ratings are supported by Tongwei's established cost and technology leadership in the steadily growing solar photovoltaic (PV) sector, sufficient liquidity and adequate access to external funding, and a track record of strong execution and financial prudence through previous industry cycles. Bolstered by these pillars, Tongwei Co. demonstrates exceptional anti-cyclical capabilities in navigating.
