

# Are solar panels divided into different sizes

## Overview

---

Absolutely—commercial and utility projects often use larger 72-cell or 96-cell solar photovoltaic panel sizes, which can be 78 inches or longer. This size offers the best balance between power output, handling ease, and fitting standard roof dimensions. By the end, you'll feel ready to choose. They come in various sizes and configurations, each suited for different applications.

Compact Panels: Smaller panels.
