

# Are solar panels worth buying

## Overview

---

Here's the truth: For most homeowners, solar panels are absolutely worth it. The average solar shopper saves between \$37,000 and \$154,000 over 25 years—not including any potential incentives—transforming what feels like a significant upfront cost into substantial long-term. Overall: Are Solar Panels Worth It?

Solar panels are an upfront investment that can save homeowners a significant amount of money in energy costs over the life span of the panels. Whether solar panels are worth it depends on where you live, your budget, your roof's characteristics, incentives, and how much energy you use. As you sketch out your dream system and think about your budget, our aim is to give you the knowledge to ask potential installers detailed. With rising electricity prices and better technology, many homeowners are asking: Is solar a smart investment?

The short answer is “maybe.” If you pay cash, the average system costs \$13,962 to \$27,924 before any government help or incentives. Most people break even in 6 to 12 years. We may earn revenue from the products available on this page and participate in affiliate.
