

Basement lighting using solar power

Overview

Natural lighting is free and it gives this space a warm, relaxed feeling. Sun tubes, light tubes, or solar tubes are large reflective tubes that collect sunlight at the roof and send it down to the basement for low-intensity natural lighting. To connect solar energy in the basement, follow these steps: 1. Assess the space and the lighting conditions, 2. Connecting to the electrical system must be done following. By leveraging innovative daylighting technology, you can bring the warmth and benefits of natural light into basements and interior rooms, dramatically improving their ambiance and usability.
