

# Battery energy storage prices in Chile

## Overview

---

There are a few factors driving Chile's battery boom. Lower investment costs haven't hurt. Analyst BloombergNEF's annual battery price survey, published in November 2023, recorded a 14% drop in costs from 2022 to 2023, to a record low of \$139/kWh. Fitch Ratings-Sao Paulo/New York-01 April 2025: Project finance transactions in Chile are expected to increase due to the recent commissioning of large battery energy storage systems (BESS), Fitch Ratings says. 6 GW in 2024 and electricity prices soaring to \$0. 23/kWh in mining zones, businesses demand lowest-cost BESS solutions. But who delivers quality at rock-bottom. This momentum is reflected in the data: AMI estimates that there is a 7. 1 Only 505 MW of BESS projects are currently operational in the entire region. The costs of lithium-ion batteries have fallen by 50% in a decade, with projections expecting further declines. This trend is crucial for Chile's renewable energy expansion. In July 2024, AES announced plans to construct a 763 MW solar plant with a 1,063 MW battery offering five-hour storage, as reported in pv magazine LatAm.
