

Beijing adds new hydrogen energy solar site

Overview

BEIJING -- A large integrated solar-hydrogen farm, located in the tidal flat area of eastern China, has officially commenced operations, according to its owner, Guohua Energy Investment Co., under the CHN Energy Investment Group (CHN Energy). Beijing recently took a significant step forward by launching an energy storage station that promises to redefine how we approach large-scale storage. The largest of its kind in China, the energy farm. Recognizing hydrogen energy as the most promising form of secondary clean energy and a key driver of new energy growth, Sinopec has pursued the strategy of "leading in hydrogen refueling and demonstrating green hydrogen utilization to support carbon reduction", focusing on hydrogen mobility and the. Beijing has made significant strides in enhancing its energy infrastructure, particularly in the realm of electric vehicle (EV) charging stations. This initiative aligns with the nation's broader goal of promoting new energy resources and reducing carbon emissions. As the demand for electric. In July 2021, UNIDO and the Chinese Government launched the International Hydrogen Energy Centre (IHEC). Key partners are the Ministry of Commerce, represented by the China International Centre for Economic and Technical Exchanges (CICETE) and the Beijing Municipal Bureau of Economy and In. Beijing is ramping up efforts to develop and commercialize hydrogen energy and fuel cell technologies, aiming to support China's goals of peaking carbon emissions by 2030 and achieving carbon neutrality by 2060.
