

# **Bolivia Commercial Off-Grid Energy Storage Power Station**

## Overview

---

The largest lithium-ion battery storage system in Bolivia is nearing completion at a co-located solar PV site, with project partners including Jinko, SMA and battery storage provider Cegasa. " - Bolivian Energy Regulatory Authority Report From the Amazon basin to high-altitude mining operations, solar storage adapts to Bolivia's diverse geography: 1. use 81% of electricity generation by 2030. Bolivia's scenario for 2027 according to MHE (2009) states that biomass sources will % of the total global energy consumption. The PV systems combined with buildings, not only can take advantage of PV power panels to replace part of the building. The world's largest PV-diesel hybrid power plant system with battery storage was commissioned in December 2014, in the Bolivian province of Pando. SMA is not only supplying photovoltaic inverters for this project, but is also providing an SMA Fuel Save Controller for demand-driven control of solar. aures, Bolivia. In the case of the Bolivian remote highlands, off-grid PV-battery systems are heavily on natural gas (AETN, 2016). It offers maximum design flexibility with its dual MPPTs supporting 3 strings each, a robust IP65 design for durability, and is backed by a 10-year warranty for complete peace of mind.

## Bolivia Commercial Off-Grid Energy Storage Power Station

---

### Grid storage system Bolivia

The largest lithium-ion battery storage system in Bolivia is nearing completion at a co-located solar PV site, with project partners including Jinko, SMA and battery storage provider Cegasa.
