

Brazil power grid energy storage equipment procurement

Overview

Brazil's Ministry of Mines and Energy has launched a public consultation to prepare the country's first battery storage auction, scheduled for April 2026. The move marks a long-awaited step toward contracting large-scale energy storage and could advance the development of a domestic. The auction aims to boost Brazil's grid reliability by integrating energy storage for wind and solar power. The auction, to take. Brazil's energy sector stands at a pivotal moment as the nation prepares to launch its first dedicated Brazil storage capacity auction in 2026. This groundbreaking initiative represents more than just another procurement mechanism - it signals Brazil's strategic commitment to grid modernisation and. Changes to Brazil's first capacity reserve auction of 2025 could undermine the expansion of the procurement regime to include battery energy storage systems (BESS) in the second exercise of the year, according to Markus Vlasits, chairman of Brazil's energy storage trade body. The auction presents significant opportunities for U.
