Overview

Solar energy has great potential in Brazil, with the country having one of the highest levels of insolation in the world at 4. [4] As of 2019, Brazil generated nearly 45% of its energy, or 83% of its electricity, from renewable sources. 9 GW at February 2025, which consists of about 21. 9% of the country's electricity matrix. Distributed solar generation capacity grew from less than 1 gigawatt (GW) in 2018 to 40 GW in 2025 through June, accounting for 43% of all electricity capacity additions. Brazil isn't just embracing solar energy—it's revolutionizing its potential in the global energy sector. As we count down to the Solar World Congress 2025 in Fortaleza, let's dive into Brazil's solar energy history. Experts say its growth must also reach and respect communities cut off from the grid Student Brenda Rodrigues da Silva works on the installation of solar panels at Fábrica Social, a professional training centre in Brasília, Brazil. According to the Brazilian Association of Photovoltaic Solar Energy (Absolar), solar now accounts for 23. This achievement places solar.

Brazil solar panels generate electricity every day

Brazil's Photovoltaic Market Surges Past 55 GW of Solar Power

Brazil has reached a remarkable milestone in renewable energy, surpassing 55 GW of installed solar power capacity. According to the Brazilian Association of Photovoltaic Solar Energy ...
