

Brunei Water Plant Uses 120-foot Photovoltaic Folding Container

✓ 100KWH/215KWH

✓ LIQUID/AIR COOLING

✓ IP54/IP55

✓ BATTERY 6000 CYCLES

Overview

Upon completion by the end of 2026, the project is expected to be the largest SPVPP in Brunei Darussalam, generating an annual output of 64,473,000 kWh, with a potential to offset about 645,000 MMBtu of natural gas and 92 million tonnes of carbon dioxide. The folding solar photovoltaic container developed by the Huijue Group represents a pioneering, flexible, and effective solution in energy provision. Besides meeting the demand of energy in different scenarios, this container will enable optimized utilization of resources by introducing module design. Collapsible solar Container hit the headlines at recent trade fairs with the latest generation of portable solar technology combining standard shipping containers and collapsible solar panels for rapid deployment, end-to-end scenario flexibility, and intelligent management systems. The systems use. This project is a critical step in Brunei's journey to achieve net-zero carbon emissions by 2050, a target enshrined in the Brunei Darussalam National Climate Change Policy (BNCCP). The solar plant is a joint venture between Berakas Power Company (BPC) and TotalEnergies Renewables, Brunei. This system is realized through the unique combination of innovative and advanced container.

Brunei Water Plant Uses 120-foot Photovoltaic Folding Container

Brunei photovoltaic container design

Upon completion by the end of 2026, the project is expected to be the largest SPVPP in Brunei Darussalam, generating an annual output of 64,473,000 kWh, with a potential to offset about 645,000 ...
