

Burundi load shifting

Overview

In a context of the World Bank partnering with the African Development Bank (AfDB) and others to provide access to electricity to 300 million people in Sub-Saharan Africa by 2030 – known as Mission 300, we have been closely watching some changes taking place in Burundi's power. In a context of the World Bank partnering with the African Development Bank (AfDB) and others to provide access to electricity to 300 million people in Sub-Saharan Africa by 2030 – known as Mission 300, we have been closely watching some changes taking place in Burundi's power. Residents, traders and financial institutions operating in Rumonge (southwest Burundi) say they are recording enormous losses. This is due to the instability of electricity in the province. Regideso, the only state company in charge of electricity production, is having difficulty regularly. WASHINGTON, J— A new World Bank-financed project will support the increase of electricity access in Burundi and help to improve the country's energy sector performance. The project is expected to benefit an estimated 2. Despite having potential hydroelectric and petroleum resources, the country struggles with inadequate infrastructure and ongoing civil unrest, which hinder the development of its energy. Utilities and their transmission structure are undergoing significant transformation, driven by an aging power grid and a growing shift from fossil fuels to renewable sources of energy, such as solar and wind.
