

California Kaiser Hospital Photovoltaic Energy Storage

Overview

The new microgrid system at the Kaiser Permanente Ontario Medical Center in Southern California adds 2MW of on-site solar generation and 9MWh of non-lithium battery storage capacity to the state's electrical grid, increasing reliability and supporting California's transition to 100%. The new microgrid system at the Kaiser Permanente Ontario Medical Center in Southern California adds 2MW of on-site solar generation and 9MWh of non-lithium battery storage capacity to the state's electrical grid, increasing reliability and supporting California's transition to 100%. Scheduled to open in 2029, the Kaiser Permanente Railyards Center in Sacramento will have solar panels, electric vehicle charging stations, and drought-resistant landscaping. Read more about 6 facilities where we're improving our energy use. The microgrid. Kaiser Permanente achieved carbon neutral status in 2020 and is on its way to “carbon net positive” by 2025 by buying enough clean energy and carbon offsets to remove more greenhouse gases from the atmosphere than it emits. It is located at the Kaiser Permanente Ontario Medical Center in Southern California.
