

Can I use electricity when installing photovoltaic panels

Overview

The answer is yes—it is absolutely possible to use solar panels and traditional electricity at the same time in one system. Connecting solar panels to your home's electrical system is one of the most effective ways to reduce energy costs and achieve greater energy independence. I still need power when it's raining. Actually, solar technology can be leveraged in virtually any condition, including rainy and snowy days, because some sunlight still reaches the earth. For this energy to be used in American homes, it has to go through an inverter attached to the solar array to become alternating current, or AC, electricity.
