Overview

However, when it comes to installing solar panels, homeowners often wonder if they can be mounted horizontally. The answer is a resounding yes! While it's true that most solar panels are installed at an angle to maximize sunlight exposure, there are certain circumstances where horizontal mounting. Installing photovoltaic modules or PV is one of the best solutions to combat the rising cost of power. But which one. Solar panels can be installed in various orientations depending on the roof type, available space, and specific energy needs. The two most common orientations are: 1. Horizontal (Landscape) Orientation: The longer. I'm in Ontario, Canada and I plan to build an adjustable array 14'T by 21'L with 12 - 42"x84" panels to try to get the most out of my setup all year around.
