

Can photovoltaic panels keep you warm in winter

Overview

Yes, solar power can heat your home during winter months, but it's not always a straightforward yes-or-no answer. Your success depends on where you live, how your house is constructed, the type of solar heating system you choose, and whether you have backup options available. In fact, the actual solar mechanisms may work even better in the colder months than they do in the hot months. They generate electricity even on cloudy days. From cold weather to extremes like below-freezing weather, solar panels turn sunlight into electricity for homeowners around the world. In fact, cold climates are actually the optimal environment for solar.
