

# Can plum trees be planted under photovoltaic panels

## Overview

---

The short answer is yes, solar panels can work under trees, but the shade can reduce how much energy they produce. Welcome to agrivoltaics – the game-changing practice of growing crops under photovoltaic arrays. Recent data shows agrivoltaic systems increased global farmland productivity by 60% last year, but which fruit trees actually thrive in these shaded conditions?

Not all fruits need blazing sun. Here's. Because solar systems sit underneath the bright sun, trees, shrubs, and other plants may grow and invade them. Set a routine. Wood strength: Hardwood trees will offer a bit more security—they are less likely to fall down in strong winds or have branches rip off, potentially damaging your roof and solar panels. Growth speed: From a solar perspective, the best trees are slow-growing with predictable growth patterns so you. In this blog, we'll explore the advantages of planting trees around solar farms, discuss some regulatory requirements, and recommend some of the tree varieties in stock that are perfect for this purpose. [Why Plant Trees Around Solar Farms?](#)

1. Plum trees prefer full sun when possible, and overly shady spots will reduce the amount of fruit.
