

Can solar panels be broken

Overview

Solar panels can be a great investment, cutting down on your electric bills while providing energy in an environmentally friendly way. Hail, falling branches, electrical surges or water can cause cracked or broken solar panels. They're also the most vulnerable part when dealing with nature's elements. Still, you should know the reasons why they break, how to help prevent breakages, and what to do if it happens. In this article, we go in-depth. The truth is, a broken solar panel can still function and produce power, but its performance and output will depend on the extent and nature of the damage. This guide will help you understand that balance. We'll break down the simple repairs you can. Solar panels are usually damaged by severe weather conditions, such as hail storms, hurricanes, and tornadoes. If that happens, follow these steps to get.
