

Can solar panels be used on rooftops in Grenada

Overview

In addition to utility-scale projects, there is also a growing market for rooftop solar in Grenada. Solar energy offers. Solar energy is a rapidly growing source of renewable energy in Grenada, a Caribbean island nation. The country has abundant sunshine and relatively low solar panel costs, making it a prime location for solar development. Solar panels can be mounted on rooftops or the ground, and convert particles of light energy, known as photons, into direct current (DC) electricity. Power Shift provide solar systems for commercial and residential applications.
