

Canadian Outdoor Energy Storage Cabinet Wide Temperature Range Specifications and Models

Overview

High density, capacity of 407 kWh with floor space of just 1. Modular design with high energy density. Suitable for inverter voltage ranging 600 to 1500 volts, allowing for multiple applications. The Narada NESP Series LFP High Capacity Lithium Iron Phosphate batteries are designed for a broad range of BESS solutions providing a wide operating temperature range, while delivering exceptional warranty, safety, and life. Resistance up to C5 corrosion level. converters, energy management monitoring systems, power distribution of local load power, photovoltaic power generation priority is self-generation and self-use, and surplus electricity storage. Highly Integrated System: Includes power module, battery, refrigeration, fire protection, dynamic environment monitoring, and energy management in a single unit. Flexible Expansion: The system utilizes virtual synchronous machine technology for long-distance parallel communication, enabling. High integration, small size, easy installation, operation and maintenance; IP54 protection grade, stronger environmental adaptability; Reducing the maximum demand electricity cost, with considerable economic benefits; Supporting peak shaving and valley filling, and dynamic expansion of. such as small-scale monitoring : power module, and energy management battery, refrigeration, in one.

Canadian Outdoor Energy Storage Cabinet Wide Temperature Range

Outdoor cabinet

Outdoor cabinet products use high-performance LFP cell, cycle life up to 8000 times. Products adopt an active balance solution, built-in cloud equipment, support remote maintenance and monitoring, and ...
