

# Canberra Emergency Energy Storage Power Supply Procurement

## Overview

---

The government's procurement process is already open for the Big Canberra Battery—a three-stage energy storage project through which it aims to get a 250MW grid-connected BESS built, followed by smaller systems at government buildings and neighbourhood batteries for. The government's procurement process is already open for the Big Canberra Battery—a three-stage energy storage project through which it aims to get a 250MW grid-connected BESS built, followed by smaller systems at government buildings and neighbourhood batteries for. The large-scale battery energy storage system (BESS) will provide at least 250 megawatts (MW) of power. This is enough energy to power one-third of Canberra for two hours during peak demand periods. A. The ACT Government is future-proofing Canberra's energy supply by expanding its renewable energy storage with a new partnership with global specialist energy storage business, Eku Energy, launched by Macquarie's Green Investment Group. Learn. The ACT Government has chosen Eku Energy to develop, build, and operate the next stage of the Big Canberra Battery: a large-scale battery storage facility in Williamsdale, Tuggeranong. This article explores the project's technical demands, market trends, and actionable strategies for sup As Australia.
