

Catching thieves at saint lucia solar telecom integrated cabinet batteries

Overview

The prosecution alleges that on July 3rd, 2024, the trio conspired to steal a range of telecommunications equipment from Sierratel, including a B15 3606 CDMA 3/2 site, six Aviat Eclipse 1Gbps microwave links, a DC rectifier cabinet, and twelve deep cycle VLAR Gel batteries. The prosecution alleges that on July 3rd, 2024, the trio conspired to steal a range of telecommunications equipment from Sierratel, including a B15 3606 CDMA 3/2 site, six Aviat Eclipse 1Gbps microwave links, a DC rectifier cabinet, and twelve deep cycle VLAR Gel batteries. Komrabai Mansaray, a security guard stationed at the Sierratel Telecommunication Pole in Komrabai Village, Lokomasama, Port Loko District, provided crucial testimony against three Africell employees accused of stealing Sierratel property valued at nearly four billion Leones. Testifying on Tuesday. An adversary accesses a shared site, or remote location, with intent to steal valuable materials (such as copper, batteries, and fuel) for resale. As towers are often located in remote locations, base stations are prime marks for thieves and vandals in search of an easy target. The theft of the cell tower batteries and the resultant damage to telecom sites has. Just this March and April (2025), the UK has seen a “significant rise” in crime at UK solar projects, with 11 reported incidents compared with just three reported in February. Kelly Barnes, senior crime analyst at DeterTech, said the UK is “very clearly now entering a peak period [of solar crime]. In the UK, where we have a data sharing agreement with all 43 police forces, we can confidently say that between January and August 2024 there were at least 70 reported offences against solar farms, and in more than 20% of those incidents, more than 20km of cable was stolen. What's less inspiring is the growing rash of solar panel theft (as well as the theft of other solar farm.
