

# Chile 10kW off-grid energy storage power station solar storage integrated device

## Overview

---

The off-grid design allows for independent energy generation and consumption, perfect for remote locations or areas with unreliable power supply. Featuring 13KW max solar power charging, this system enables fast recharging, minimizing downtime and ensuring uninterrupted. Chile is rapidly moving to build more power generation capacity, with much of that effort focused on renewable energy resources and battery energy storage systems (BESS). The country as part of that ambition has a goal of producing at least 70% of its electricity from renewable energy by the end of. Chile has emerged as a world leader in hybrid systems and standalone energy storage since implementing its Renewable Energy Storage and Electromobility Act in 2022.
