

# China Industrial Park Energy Storage Project

## Overview

---

China's largest supercapacitor-based hybrid energy storage system has been successfully connected to the grid in northwest China, marking a milestone for hybrid of supercapacitor and lithium-based energy storage system. Jiangsu province's largest industrial-park microgrid to boost large-scale application of new energy is put into service on March 26 in Changzhou, saving 4.6 million yuan (\$628,724) in energy costs each year and reducing carbon dioxide emissions by 7,585 metric tons. XU DUO/FOR CHINA DAILY As an. The 500 MW/1 GWh Jiayuguan NingSheng project combines lithium batteries and supercapacitors to support grid stability and renewables integration. Since beginning operations in June last year, the park has. China Energy Engineering Group Co. (Energy China) began operations of the world's largest integrated green hydrogen, ammonia and methanol project in the city of Songyuan, Northeast China's Jilin Province on December 16. The new microgrid, situated in Changzhou, incorporates advanced technologies aimed at.
