

Clean electricity oman

Overview

Nearly 90,000 homes were supplied with clean electricity, cutting emissions by 617,300 tonnes per year. OETC is strengthening the integration of clean and renewable energy into the grid to support innovation and long-term sustainability. Oman has a substantial pipeline of solar and wind projects under development and planning, totalling around 7,300 MW. MUSCAT: Renewable energy accounted for 9.46 per. The Ibri 2 solar plant generated 1. The government is looking to expand its electricity-generation capacities through renewable independent power projects (IPP), with plans to derive at least 30 percent of electricity from renewables by 2030, mainly through onshore wind and solar. Oman's National Energy Strategy identified that the country's power demands require a greater mix of energy contributors and that at least 10% of the country's power requirements should be capable of being derived from renewable energy sources by 2025. It is expected that the majority of the. The share of renewables in Oman's electricity production more than doubled in the first five months of 2025 as the sultanate rolled out new solar and wind projects. As demand rises for solar power, electric vehicles, and energy independence, a new era of integrated energy solutions is.
