

# Commissioning of electrified energy storage projects

## Overview

---

Commissioning is one step in the project implementation plan that verifies installation and tests that the device, facility, or system's performance meets defined objectives and criteria. Field experiences, lessons learned, and recent codes and standards. Clean Energy States Alliance (CESA) is a non-profit organization providing a forum for states to work together to implement effective clean energy policies & programs. ESTAP is conducted under contract with Sandia National Laboratories, with funding from US DOE. The battery ESS consists of multiple battery cells, creating a large system with. to ensure successful integration.

## Energy Storage Project Engineering Commissioning: A Step-by-Step ...

Let's face it - commissioning an energy storage project is like conducting a symphony orchestra. If one instrument (read: battery module) is out of tune, the whole performance collapses.
