Overview

All equipment shall be open and ready for inspection. The approved plans, permit, and installation instructions shall be on site at time of inspection. Major changes, including revisions, to the installation shall be submitted to the AHJ for review and approval prior to. All equipment shall be open and ready for inspection. The approved plans, permit, and installation instructions shall be on site at time of inspection. Major changes, including revisions, to the installation shall be submitted to the AHJ for review and approval prior to. Checklist to assist with field inspections of residential and small commercial battery energy storage systems. 25 The Electrical Checklist is intended to be utilized as a guideline for field inspections of residential. Below is the inspection checklist developed by this working group. Its items are organized generally in order of what an inspector may find during a walk-through of an energy storage site.

- Is an overall safety plan in place?

- o Does the facility have a safety plan documented?

- o Does it address. Providing an online list of inspection requirements will reduce informational barriers between inspectors and installers, helping to ensure that all items in the inspection process have been adequately addressed before inspectors arrive on site. All equipment shall be open and ready for prior to inspection. The concerns serve as a check list for installation requirements performed by the civil and electrical contractors.
