

# Cook islands solar cabinet-based off-grid type

## Overview

---

The system consists of a 40KWH Powerbrick lithium battery, a 16KVA off-grid hybrid inverter, and GSL PV solar panels, designed to meet the energy demands of a larger home while promoting energy independence. Renewable energy in the Cook Islands is primarily provided by solar energy and biomass. Since 2011 the Cook Islands has embarked on a programme of renewable energy development to improve its energy security and reduce greenhouse gas emissions, [1] with an initial goal of reaching 50% renewable. Mitiaro, a stunning island in the Cook Islands, is known for its pristine environment and strong community spirit. Now, with the installation of a 12-panel GridFree solar package - The Tui Solar Nest, residents can enjoy reliable, off-grid energy that aligns with their sustainable way of life. Our technology can also operate with most grid tied PV inverters, in on-, or off-grid mode, ensuring optimal value of existing solar installations. (New Energy Solutions Optimised for Islands).
