

Croatia solar Module Project

Overview

JA Solar is to supply its high-performance DeepBlue 4.0 Pro modules for the 99MW Korlat solar PV project, now under construction in Croatia. The solar farm, currently under construction, has been developed by China Northern International Group and Shandong Electric Power Engineering Consulting. Croatia is expected to surpass 1 GW of solar power by 2025, driven by a significant increase in installations and supportive policies. The expansion is part of the country's broader commitment to renewable energy and aligns with EU targets to boost the share of renewables in electricity generation. 0 Pro modules power Croatia's largest solar farm, energizing 50,000 homes and boosting renewable capacity with 165 GWh annually. [Link copied! Copy failed!](#) Croatia's Prime Minister and China's Ambassador have endorsed the project as a milestone in bilateral energy cooperation.
