

# Cyprus solar power station power generation installation

## Overview

---

This guide aims to provide a comprehensive overview of everything you need to know about installing a photovoltaic system in Cyprus. Cyprus is experiencing unprecedented growth in utility-scale solar development, with 797 MW of installed photovoltaic capacity as of December 2024 and ambitious plans for gigawatt-scale expansion by 2030. As the Mediterranean's emerging solar powerhouse, Cyprus offers exceptional opportunities for. The EAC (Electricity Authority of Cyprus) reported that 2,196 households installed rooftop solar panels in the first 7 months of 2020, despite the global COVID-19 pandemic and the associated financial, economic, and social disturbances. Whilst this was on track to be the highest number of. Basking in more than 3300 hours of sunlight per year, Cyprus has the highest solar power potential in the European Union but currently imports most of its energy.
