

# DC microgrid construction projects in my country

## Overview

---

Utility regulators for the District of Columbia are willing to wager that investment to strengthen the local grid is best deployed in new distributed energy projects that include multi-customer and neighborhood microgrids, according to a new request for proposals (RFP). “Buildings included in the microgrid can be residential, commercial, or municipal. Department of Energy (DOE) Office of Electricity today. The selected project aims to support Washington, D. 's climate goal of achieving carbon neutrality by 2045. The Public Service Commission of the District of Columbia (Commission) has issued a Request for Proposals (RFP) for the Transactive Neighborhood Renewable Microgrid Pilot Project, an. Announcing our latest PowerPath DC pilot project, a transactive neighborhood renewable microgrid. As these devices make up a large share of generation and demand, it is only natural to string them together on DC Microgrids.
