

Discharge price of Barbados new energy storage power station

Overview

One 10MW system and five 1MW systems would've been put into operation before the end of this year, at an estimated cost of BBD\$107.7 million; the remaining. The Barbados Fair Trading Commission (FTC) ruled this week (6 May) that the costs of 15MW of the total portfolio of battery energy storage systems (BESS) BLPC applied with can be recovered through a so-called Clean Energy Transition Rider (CETR). With Barbados targeting an energy transition from. This first tranche of the competitive procurement process aims to deploy 60 MW (240MWh) of new Battery Energy Storage Systems (BESS) in Barbados, aiming to unlock renewable energy (RE) access to the grid, improve grid stability, allow better demand management, and mitigate supply interruptions. Barbados has launched the second phase of its Battery Energy Storage System (BESS) procurement process, a critical step in tackling ongoing grid congestion that has stalled the growth of the renewable energy sector. The launch event, hosted by the Ministry. Barbados has taken a significant step toward transforming its energy landscape with the launch of the Caribbean's first competitive Battery Energy Storage System (BESS) auction — a development that could redefine how renewable energy is integrated, financed, and scaled across island grids. The competitive process will award 60 MW / 240 MWh of battery energy storage systems. It marks the first time Barbados has used price-based competition in its power sector, creating a potential blueprint for other Caribbean markets.
