

Distributed photovoltaic panel installation cost

Overview

Solar panel installation cost averages \$27,181 for a standard home, with most homeowners spending between \$18,351 and \$36,409. Prices vary based on system size, panel type, and installation complexity. 50 per watt installed, with larger systems. NLR analyzes the total costs associated with installing photovoltaic (PV) systems for residential rooftop, commercial rooftop, and utility-scale ground-mount systems. NLR's PV cost benchmarking work uses a bottom-up. Each year, the U. Department of Energy (DOE) Solar Energy Technologies Office (SETO) and its national laboratory partners analyze cost data for U. solar photovoltaic (PV) systems to develop cost benchmarks. These benchmarks help measure progress toward goals for reducing solar electricity costs. Berkeley Lab collects, cleans, and publishes project-level data on distributed* solar and distributed solar+storage systems in the United States. The data are compiled from a variety of sources, including utilities, state agencies, local permitting agencies, property assessors, and others. The. Calculate 2025 solar panel installation costs, see payback periods, and explore federal and state incentives with our interactive calculator. Solar panels can lower your electricity bill by 75% or more, but the upfront investment is significant. Most homeowners spend between \$12,600 and \$33,376 to install a complete residential solar system in 2026, with the national average at \$19,873 before incentives. Check with a local pro for your specific job.
