

Does the solar farm generate electricity in Civilization 6

Overview

The Solar Farm is a standard tile improvement in Civilization VI: Gathering Storm. It is used to supply renewable Power to its city from flat terrain tiles. The Solar Farm is another, arguably more easily accessible way of supplying. Unlocks the Builder ability to construct a Solar Farm. Each array is made up. For example - I have a city that consumes 2 energy, it has 3 solar farms, so 6 energy should be available from renewable sources (if I understand one solar plant provides 2 energy), and yet it converts 2 energy from resources. Am I missing something or is it broken?

I haven't tried other renewable. I have solar and wind farms around the city, why is that not generating power?

From this screen shot, I suspect the 6 (I think?

) power you're generating is not enough for all the power needs of the city. Understand the technological prerequisites for solar power, 2.

Does the solar farm generate electricity in Civilization 6

range of solar farms? :: Sid Meier's Civilization VI General Discussions

If its within your borders, it will send the electricity to the closest city, even if that city is 20 tiles away (and even if that city can't or doesn't want to work the solar tile)
