

# Double-glass photovoltaic panels weigh 450 kilograms

## Overview

---

A panel of this standard dimension typically weighs around 40 pounds, which translates to about 18 kilograms. This weight makes them manageable, but still requires careful lifting during installation. Understanding these specifications is crucial for determining roof. The DMEGC 450W bifacial panel delivers exceptional performance, long-term durability, and sustainability. Built with a double glass design and N-Type cells, it offers superior energy output and environmental credentials. Low-carbon The FLASH panel production releases less CO<sub>2</sub> than a standard solar PV panel. " - Solar Energy Industries Association (SEIA) report 2023 1. Frame Material Aluminum frames account for 25-30% of total weight.
