

# Dubai Mobility and Battery Storage

## Overview

---

The 49th edition of Middle East Energy (MEE) 2025 has officially opened its doors at the Dubai World Trade Centre (DWTC), placing energy storage and battery technologies at the forefront of global conversations on sustainability and the clean energy transition. More than 40,000 global energy professionals, including over 500 key buyers, are anticipated to visit DWTC before April 9 to discover innovations from more than 90 countries. As the Middle East, traditionally known for its oil reliance, accelerates its adoption of clean. New policy initiatives to speed the rollout of charging infrastructure and faster adoption of electric vehicles could enable the UAE to achieve and even exceed its eMobility goals. This year's expo is the biggest and. As industries in the UAE continue to expand and innovate, the need for reliable power sources has become central to planning and execution. This growing requirement is now being met through on-demand clean power solutions, made possible by Positive Zero's mobile battery energy storage system.
