

Dublin communication base station battery energy storage system installation energy storage

Overview

ESB has opened a major battery plant at its Poolbeg site in Dublin today, 7 February. This new battery plant will add 75MW (150MWh) of fast-acting energy storage to help provide grid stability and deliver more renewables on Ireland's electricity system. At its Dublin 1 site in the Citywest. The one-stop energy storage system for communication base stations is specially designed for base station energy storage. Users can use the energy storage system to discharge during load peak periods and charge from the grid during low load periods, reducing peak load demand and saving electricity. "Energy storage like this major battery plant at the ESB's flagship site in Poolbeg will be a core part of Ireland's new renewable energy transition," Eamon Ryan said.
