

EU approves solar panels

Overview

Members of European Parliament (MEPs) have adopted the EU Solar Standard, which will require the installation of solar on buildings across EU member states. The European Solar Charter, signed on 15 April 2024, sets out a series of voluntary actions to be undertaken to support the EU photovoltaic sector. Solar energy, in particular photovoltaics (PV), is currently the fastest growing renewable energy source in the EU. Last year, 56 GW of solar PV were. Legislation that would require EU member states to integrate solar installations into future building works, and retroactively install PV on buildings, is one step closer to becoming law, after being approved by members of the European Parliament. This means that solar installations must be integrated into building works. The Solar Energy Strategy is part of the EU's RepowerEU plan to phase out Russian fossil fuels and accelerate the green transition in response to Russia's invasion of Ukraine.
