

# Electric Energy Storage and Electrochemical Energy Storage

## Overview

---

This chapter describes the basic principles of electrochemical energy storage and discusses three important types of system: rechargeable batteries, fuel cells and flow batteries. A rechargeable battery consists of one or more electrochemical cells in series. (a) Circuit for capacitor discharge (b) Relation between stored charge and time Fig3. As a sustainable and clean technology, EECS has been among the most valuable options for meeting increasing energy requirements. D. Harrison, The Royal Society of Chemistry, 2018, pp.
