

Energy Storage Management System Introduction

Overview

In the context of Battery Energy Storage Systems (BESS) an EMS plays a pivotal role; It manages the charging and discharging of the battery storage units, ensuring optimal performance and longevity of the batteries which ultimately determines the commercial return on investment. An EMS needs to be able to accommodate a variety of use cases and regulatory environments. Our main goals are to ensure a reliable and secure energy supply, promote effective competition in the energy market, and develop a dynamic energy sector in Singapore.
