

Energy company uses 1MWh solar energy storage unit in Peru

Overview

Sungrow has been selected by Zelestra to deliver advanced photovoltaic (PV) inverter solutions for the San Martín solar project, marking the largest solar project partnership in Peru to date. The project will generate 830 GWh of clean electricity annually, powering over 440,000 homes and reducing 166,549 tons of CO₂ emissions. The. A 1MWh containerized energy storage system integrates all key components — battery modules, BMS, inverter, and energy management system — within a single movable container. It acts as both a power buffer and a grid stabilizer, storing renewable energy during low demand periods and releasing it. Sungrow will supply its 1+X modular inverter, an 8.8MW medium-voltage turnkey solution. MINEM plans to commission 14 solar projects totalling 2.
