

# Energy-saving wind power generation ranking

## Overview

---

This dashboard ranks countries/areas to their renewable energy power capacity or electricity generation. China is the largest producer of wind power in the world, having generated 466.3 TWh in 2021-22, doubling the. In 2025, the global wind energy sector continues its strong upward trajectory, with total installed capacity surpassing 1,170 GW and over 117 GW added in the past year alone. While Texas is known for its oil derricks and natural gas pumps, wind turbines have become a major part of the state's landscape.
